## PROFESSIONAL SUMMARY

---

Product Designer with 7+ years of experience architecting interfaces for complex SaaS platforms, developer tools, and technical workflows. Specialized in defining UI/UX patterns for high-density data, multi-step reasoning, and long-running systemic tasks. Proven ability to push web and application design boundaries beyond standard templates while partnering closely with engineering to ship performant, code-validated interfaces.

Deeply embedded in open-source and developer communities. Actively explores agentic workflows, automation, and AI integration through hands-on technical environments and community leadership. Focused on navigating ambiguous design problems, balancing high-fidelity art direction with strict structural and technical constraints.

## KEY COMPETENCIES

---

**Design & Architecture:** Information Architecture, Human-in-the-Loop UX, Interaction Design, Developer Tools, Typography, Art Direction, Systems Architecture, Dense Data Visualization.

**Technical Execution:** Prototyping (HTML/CSS/JS, Figma), Motion (GSAP, Framer Motion, Lenis), End-to-End Project Ownership, Cross-Surface Design (Web, App, Technical Dashboards).

## WORK EXPERIENCE

---

### SomeTech Work

Dec 2025 – Jun 2026

*Product Designer*

- Navigated ambiguous product requirements to architect structural blueprints and execute UI/UX designs for complex web applications across multiple surfaces.
- Partnered directly with engineering teams to ship polished, performant front-end interfaces, bridging the gap between high-fidelity visual design and conceptual HTML/CSS structures.
- Engineered WCAG-compliant interfaces, balancing baseline user accessibility with the functional needs of technical power-users.

### Eclectic

Mar 2025 – Dec 2025

*Product Designer*

- Executed the architectural redesign of large-scale applications using a modular Figma design system, pushing the boundaries of standard web patterns to create fluid, agency-tier aesthetics.
- Integrated AI-assisted tools and agentic workflows to accelerate structural ideation, visual asset production, and multi-region deployment logic.
- Constructed complex interactive prototypes to validate precise product behavior, motion, and routing logic prior to technical implementation.
- Supported overarching art direction, ensuring cohesive brand expression across various product and digital surfaces.

### WPMU DEV

May 2022 – Sep 2024

*Product Designer, Remote*

- **Developer Workflows:** Engineered a highly scalable atomic design system utilized across multiple SaaS products by millions of users, defining UI/UX patterns for technical, customer-facing workflows.
- **Multi-Step Reasoning & Long-Running Tasks:** Redesigned Snapshot backup/restore workflows to support independent database, media, and code restoration, transforming an opaque, long-running systemic task into a clear, modular, human-in-the-loop experience.
- **Performance UI:** Designed the Delay JS and Critical CSS workflows for Hummingbird, optimizing navigation logic and task completion for technical power-users while reducing page load times from 5 seconds to near-instant.
- **Compression Architecture:** Introduced lossy, lossless, and ultra compression tiers in Smush, enabling 26 MB images to compress to 500–800 KB at 8K resolution with intuitive, side-by-side comparison interfaces.

## Searchmetrics

May 2021 – Jan 2022

*Product Designer (Contract), Remote*

- **Art Direction & Brand Expression:** Supported visual direction across product and marketing surfaces, designing precise visual assets aligned with overarching brand and product launch objectives.
- **Technical Visualization:** Mapped and visualized dense SaaS data workflows and complex API capabilities to clearly communicate system architecture to end-users and stakeholders.

## IdeaJam

Aug 2021 – Jan 2022

*UI/UX Designer*

- Executed the comprehensive UX restructuring of a task-management SaaS, resolving critical architectural bottlenecks utilizing quantitative user data and interactive testing.

## TECHNICAL TOOLKIT

---

**Design & Prototyping:** Figma, Component Variables, Interactive Logic Prototyping, Spline.

**Motion & Visual Execution:** GSAP, Framer Motion, Lenis, After Effects, Typography & Layout.

**Technical Integration:** HTML/CSS/JS conceptual alignment, WordPress ecosystem, Terminal/CLI conceptual models.

**AI & Automation:** LLMs (Claude, Gemini, NotebookLM), n8n, AI-Assisted Architecture Workflows.

## COMMUNITY & OPEN SOURCE

---

- **n8n Ambassador & AI Advocate:** Actively builds and champions multi-step agentic workflows and automation within the open-source developer ecosystem.
- **AI Event Speaker:** Frequently translates ambiguous AI capabilities into clear, actionable workflows for students and professionals through live technical demonstrations.
- **Developer Communities:** Core organizer and active participant in Google Developer Group (GDG), Kanpur FOSS, and WordPress open-source initiatives.

## EDUCATION & CERTIFICATIONS

---

**Master in Computer Application** | AKTU University (2014 – 2017)

**Bachelor in Computer Application** | CSJM University (2011 – 2014)

**Certifications:** Google Generative AI Prompting Specializations (2025), Google UX Design Foundations (2025).
