

Hitanshu Sahu

Product Designer — WordPress Ecosystem Specialist

☎ +91-9696449295 — ✉ phantomcluster17@gmail.com — 📍 Kanpur, Uttar Pradesh, India — [Linkedin](#) | [Portfolio](#) | behance.net/phantomcluster

PROFESSIONAL SUMMARY

I'm a tech-obsessed Product Designer with over 7 years of experience designing intuitive, scalable UI/UX systems for *complex SaaS platforms* and the **WordPress ecosystem**. Specialist in creating **Starter Templates**, optimizing **Gutenberg/Elementor** workflows, and translating technical requirements into human-centered solutions. Known for an accessibility-first mindset, strategic thinking, and the ability to balance user delight with engineering constraints in fast-paced environments.

WORK EXPERIENCE

SomeTechWork

Dec 2025 – Jun 2026

Product Designer & Frontend Designer

- Developed product blueprints and translated client requirements into clear, user-centered UI/UX designs.
- Designed and implemented front-end pages in **WordPress** using **Elementor** and **Gutenberg**, ensuring visual consistency and usability.
- Ensured responsive design across devices and screen sizes, optimizing layouts for performance and clarity.
- Applied accessibility best practices (WCAG-aligned) to deliver inclusive, compliant user experiences.

Eclectic

Mar 2025 – Dec 2025

Product Designer & Social Media Designer

- Created comprehensive product blueprints to define structure, flows, and design direction across features.
- Led the app redesign using a scalable **Design System**, supporting multi-region requirements and localization, built and maintained in Figma.
- Leveraged AI tools to accelerate and enhance graphic design workflows, improving speed and creative output.
- Designed motion graphics and visual content for digital platforms using After Effects and AI-assisted tools such as Gemini and Loveart.

WPMU DEV

May 2022 – Sep 2024

Product Designer, Remote

Design System V3

- Spearheaded a scalable atomic design system in Figma with accessibility baked in.
- Built a monochrome mode in alignment with **WordPress standards** for white-label use.
- Balanced futuristic visual direction with practical resource constraints.

Smush Plugin (1M → 2M+ Installs)

- Redesigned key flows for image compression, introducing background scanning.
- Launched Ultra Compression with a seamless upgrade funnel, boosting Pro conversions.

Hummingbird V3 Redesign

- Streamlined onboarding into a single-screen setup; reduced bounce rate.
- Added automation and filter controls to Delay JS and Critical CSS flows.

Snapshot V3 UX Overhaul

- Enabled modular backup restore (files or DB), reducing restore time errors. Created intuitive design for the Snapshot.
- Simplified dashboard UX and improved error prevention UI logic.

Dashboard V3 Redesign

- Led complete overhaul of the WPMU DEV dashboard with a user-first focus.
- Designed and documented reusable component libraries across plugin and membership flows.
- Improved navigation clarity and addressed long-standing usability gaps.
- Used Maze to test interactive prototypes and GPT to synthesize user feedback into design variations.

Searchmetrics

May 2021 – Jan 2022

SaaS Videos, Brand Guidelines, Remote

- Produced engaging animations demonstrating the SaaS platform’s data-driven capabilities and how each feature (including the API) works together to deliver insights.
- Designed graphics and brochures that aligned with brand objectives and highlighted core sales points.
- Created awards designs for select clients, celebrating their successes while strengthening brand loyalty.
- Worked closely with the marketing team to develop promotional materials, supporting various campaigns and feature launches.

Ideajam

Aug 2021 – Jan 2022

UI/UX Designer

- Led a Kanban/task-management SaaS redesign, boosting collaboration and idea generation. Leveraged user feedback to remove bottlenecks and create a more intuitive experience.
- Built the product with white-labeling in mind, ensuring it can be easily adapted to different brands without sacrificing consistency.
- Created a fresh design system from scratch, providing a unified look and feel across the platform while maintaining flexibility for future updates and customizations.

Themeisle

Jul 2018 – May 2021

Starter Template Designer (Neve Theme)

- Designed **50+ diverse layouts** for Neve Theme, ensuring compatibility and performance optimization.
- Conducted thorough research on niche requirements, focusing on typography and color for cohesive design.
- Delivered layouts that maintained Neve’s performance standards while enhancing user experience.

CORE STRENGTHS

- Design Systems (Atomic)
 - **Starter Templates**
 - **WordPress (Gutenberg/Elementor)**
 - UX Strategy & Psychology
 - Generative AI / LLMs
 - Prompt Engineering
 - User Flow Mapping
 - Wireframes & 3D Design
- Accessibility (WCAG)
 - UI Optimization
 - Interaction Design
 - Animation
 - Motion UI
 - Agile Collaboration
 - SaaS Product Design
 - Developer Handoff

TOOLS

Design: Figma, Miro, Maze, Illustrator, Spline
WordPress: Elementor, Gutenberg, Beaver Builder (Familiar)
Motion/Video: Adobe Premiere, After Effects
AI Workflow: Gemini, GPT, Loveart

EDUCATION

Master in Computer Application	2014 – 2017
AKTU University	
Bachelor in Computer Application	2011 – 2014
CSJM University	

CERTIFICATIONS

Google Generative AI & Prompting Specializations	2025
<i>Google Cloud Skills Boost</i> Includes Prompt Design in Vertex AI, Image Generation, MLOps, and Large Language Models.	
Foundations of User Experience (UX) Design	2025
<i>Google</i>	
UX/UI Design & Psychology Certifications	2022 – 2025
<i>Uxcel</i> Includes UX Design Psychology, 3D Design Foundations, Accessibility, and UI Components.	

COMMUNITY ORGANIZING

Google Developer Group, Kanpur FOSS, WordPress, n8n ambassador, AI Workshop

LANGUAGES

English, Hindi , German (Learning)
